A paid summer internship program designed for highly motivated high school and undergraduate students who demonstrate an academic interest in biomedical sciences. Selected interns will have the opportunity to personalize their own summer project based off their own strengths within STEM.

**Program Overview**
- Personalize your own summer project
- Work and collaborate with AMI staff
- Learn about healthcare innovation and investment
- Develop critical thinking for biomedical innovation
- Expand your skill set outside the classroom

**Eligibility & Requirements**
- Must be a high school or undergraduate student
- Prepare and give final project oral presentations during the week of July 27th
- Must commit to a minimum of 2 days at AMI-USC per week
- Selected students are expected to provide their own transportation to the USC University Park campus

Application instructions can be found at: ami.usc.edu/outreach/intern-info

**Application Deadline:**
6pm PST March 1st, 2020

Semi-finalist candidates will be notified via email by March 15, 2020 with invitations to attend an optional orientation session at AMI-USC in April 2020 and receive finalist selection instructions.
